

News Release - July 5th 2011.

UK Jobs App on iPhone and Android

1Job.co.uk has announced the newest update (2.1) to their popular job search application "UK Jobs". The updated version has already shown itself to be very well-liked, ranking within the Top 10 Free Business Apps for iPhone. The Android Market version of the App is equally popular with a world ranking in the top 20 for the term 'jobs'.

The UK Jobs App is owned and operated by 1Job.co.uk the UK and Ireland's Job Search Engine. Using 1Job.co.uk, or the UK Jobs App candidates can search for the very latest jobs advertised on the UK and Ireland's most popular job sites. The UK Jobs App is claimed to be the ultimate mobile resource for jobseekers on the move helping them to search and find their next job fast, even when away from their PC.

The UK Jobs App features and enhancements include:

- Simple keyword based searching – Find jobs by Job Title and Location.
- Improved and clear navigation – User friendly get straight to the jobs you want.
- Email Jobs – Send yourself jobs for viewing and applying later.
- iOS 4 compatible and Retina display support for iPhone users.

Julian Felstead, the MD of 1Job says, "The efficiency and reliability of the updated app has been dramatically improved. Jobseekers on the move need the convenience of an effective job search tool and our app provides this simply to them. By harnessing the power of our jobs database the UK Jobs App has access to over 300,000 job opportunities at any time."

Recruiters and Job Boards can display their vacancies on the UK Jobs App by using 1Job.co.uk for their traffic acquisition. 1Job.co.uk offer a two week free trial of their pay-per-click product to companies displaying more than 50 jobs on their website.
